Transport for Boston

A bid for a share of Government funding to speed reduction of congestion and boost economic growth in Boston

We, the undersigned, petition the Government for Boston to be included in this summer's major road network announcement, to provide funding to help speed planned road improvements to reduce congestion on the major A16 route, an important transport link in an area vital for food security. The Boston Distributor Road would also boost economic growth and housing availability and address known air quality issues.
